My office has continued our efforts to provide the best services and technology available both in Texas and throughout the Country. In order to increase the overall searchability of our records, our ROAM site has been updated to include Phonetic Search functionality. This functionality allows users to search based on how a name is pronounced, not just how it is spelled. In the future my office may charge a fee for the use of these, and other, premium features that we intend to add to the ROAM site, however for now we have provided them to you free of charge.

- John F. Warren, Dallas County Clerk

## Phonetic Search:

### What is a Phonetic Search?

ROAM's Phonetic Search uses advanced methods to search across names indexed within the system and return records where the name is pronounced like the name that is being searched on. The phonetic search will only apply these advanced methods to names in the index, and not to other fields. Also, as a result of searching across the indexed names for results that are pronounced like the name being searched on, the phonetic search will bring back more results than a traditional exact name search.
