Introduction

ROAM Rapid Online Access Method, is a robust, easy to use, enterprise data retrieval solution. ROAM allows you to run full text searches across all data elements, or selected data elements, with near instant results. Learn more about ROAM and its capabilities below.

Key Tips for all Search Options:

- 1. Within the ROAM's homepage users are able to perform the following searches.
 - a. Full name search: Jane Smith
 - b. Business name search: Something Different
 - c. Instrument #: 200800236985d. Volume/Page: 82126 25255

2. The ROAM database will return every instance of your search criteria that has been recorded.

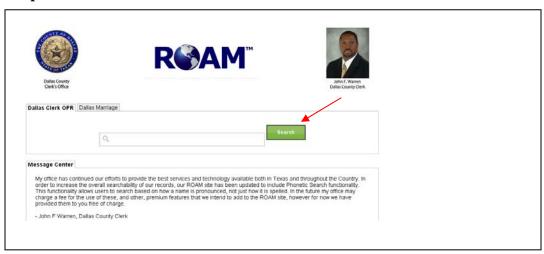

* Click on any column in the search result grid to sort your results.

Advanced Search Tips:

The advanced search allows users to search county records by instrument number, a date range, full name and business name, designated status, and full legal description.

Step 1: Click the Search button

Step 2: Click the Advanced Search link

All Records Verification

Step 3: Advanced Search Screen

^{*}The AND statement, on the right hand side does not have to be changed.

^{*}Users may enter all or partial information requested for the advance search.

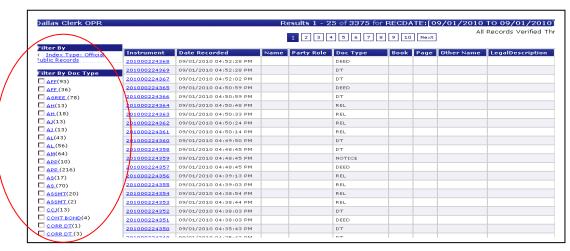

FILTER Your Search Results

ROAM's advance search allows you to narrow your search through a series of functions.

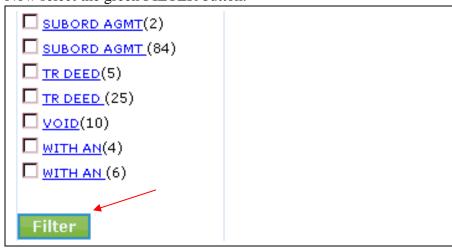

- 1. Filter by Index Type: Document Type
- 2. Filter by Party Role: Grantor/Grantee
- 3. Filter by Date Recorded

Once you have decided what type of filter you would like to do the next step would be to click one of the blue links. If you have chosen to filter by document type select the Official Public Records link then select all the document types that apply to your search.

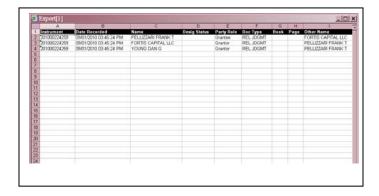

Now select the green FILTER button.

PRINTING/EXPORTING SEARCH GRID

The ROAM site allows users to copy the search grid into other programs. With the ROAM system users are able to export to Excel, PDF, or RTF (Word).

Phonetic Search:

What is a Phonetic Search?

ROAM's Phonetic Search uses advanced methods to search across names indexed within the system and return records where the name is pronounced like the name that is being searched on. The phonetic search will only apply these advanced methods to names in the index, and not to other fields. Also, as a result of searching across the indexed names for results that are pronounced like the name being searched on, the phonetic search will bring back more results than a traditional exact name search.

Marriage Record Search:

Select the Dallas Marriage icon

Marriage Quick-Tip

- a. On the ROAM's homepage you are able to search by the bride or groom's name within the search box.
- b. The search will return every instrument indexed as Jane Smith.

Advanced Marriage Search:

Step 1: Select the Dallas Marriage icon and then click Search
